Re: 99P-1340/CP 1
Petition to Have "Eternity eau de Parfum" Misbranded

To Whom It Concerns:

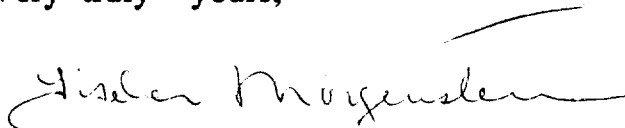

I have asked my daughter to write this letter for me. I am a 90 year-old woman who has seen two of her grandchildren suffer from severe allergies. My grandson has had allergies all his life. Being near someone who is wearing perfume makes him start wheezing and coughing so that he needs to use medication to breathe. My granddaughter used to be alright, but lately she gets sick all the time from perfumes, too..

I myself never had any problems, but now my nose runs and I cough so I can't see when people use perfume around me!!

My daughter told me that the perfume "Eternity" has dangerous chemicals. You can imagine that this worries me, after what I've told you. Lots of people don't know when they wear a perfume like "Eternity" that they are making others sick.

Let's please get this perfume off the market.

Very truly yours,

Gisela Morgenstern
